PROFESSIONAL SUMMARY

IT infrastructure and DevOps professional with 12+ years in IT, including 7+ years in DevOps and cloud infrastructure. Experience spans AWS production environments, Kubernetes, infrastructure as code, CI/CD and operational reliability. Previously led systems administration teams and coordinated enterprise infrastructure work. Combines hands-on automation and production troubleshooting with cross-functional collaboration, technical documentation and release support. Background includes enterprise IT and financial services, with a focus on maintainable infrastructure and reliable engineering delivery.

CORE TECHNICAL SKILLS

Cloud: AWS: EC2, S3, EKS, VPC, IAM, RDS, ALB/NLB; additional exposure to Azure, GCP

Containers & IaC: Kubernetes, Docker, Helm, Terraform, Ansible

CI/CD: Jenkins, GitLab CI/CD, GitHub Actions, TeamCity, Spinnaker, Gerrit, SonarQube

Reliability: Prometheus, Grafana, Alertmanager, ELK, Zabbix; incident investigation

Systems & automation: Linux, Windows Server, networking, VMware/Hyper-V, Bash, Python, Groovy

Operations: Infrastructure coordination, team leadership, production support, technical delivery

PROFESSIONAL EXPERIENCE

GlobalLogic | DevOps Engineer

May 2022 – Jun 2026

- Maintained CI/CD and release workflows across customer projects using Jenkins, GitLab CI, Gerrit, SonarQube and Spinnaker.
- Automated infrastructure provisioning and operational tasks with Terraform, Ansible, Bash, Python and Groovy.
- Worked with development teams to troubleshoot infrastructure, validate changes and support production releases.

West Auto Hub | DevOps Engineer (Contract)

Sep 2025 – Jan 2026

- Maintained Linux infrastructure for PHP/Laravel services with Nginx, MySQL, Redis and Elasticsearch.
- Supported deployments, monitoring, backups and incident troubleshooting.

Midcontract | DevOps Engineer (Part-time)

Oct 2024 – Sep 2025

- Built AWS infrastructure for production workloads and automated provisioning with Terraform and Ansible.
- Managed Kubernetes and Helm deployments and delivery workflows across GitHub, GitLab, Jenkins and TeamCity.

PrivatBank | DevOps

Dec 2021 – Jul 2022

- Supported the migration of services from OKD to AWS EKS, including deployment validation.
- Configured Linux, Nginx, networking, monitoring and Terraform infrastructure; automated CRM application and database deployments.

UAPAY | Technical Integration Engineer

Aug 2020 – Dec 2021

- Integrated customer infrastructure and financial services with company systems and supported technical onboarding.
- Worked on payment monitoring, automated reporting, service deployment and integration documentation.

Namecheap Inc | Site Reliability Engineer

Mar 2020 – Jun 2020

- Supported production reliability through monitoring, incident response, performance analysis and root-cause investigation.
- Automated recurring operational tasks and collaborated with engineers to resolve service issues.

Fozzy Group | Team Lead System Administrator

Sep 2015 – Mar 2020

- Led infrastructure engineers and coordinated vendors and contractors for enterprise IT operations.
- Managed data center infrastructure, VMware/Hyper-V, Windows Server, SQL systems, networking and monitoring.
- Planned infrastructure work, supported budgeting and capacity planning, and reported operational status.

SELECTED PROJECT

PipeForge — Python/YAML build logic shared across local execution, GitHub Actions, GitLab CI and Jenkins; dependency handling, execution reports and resumable runs.

https://github.com/CloudOpsMaster/pipeforge

EDUCATION

Kharkiv National University of Radio Electronics

Master’s degree, Information Management Systems and Technologies | 2022 – 2024

Master’s degree, Financial and Economic Security | 2011 – 2013

Master’s degree, Information Security | 2007 – 2013

LANGUAGES

Ukrainian — Native | English — B2–C1
